

"Brayka Resorts is more than a holiday destination; we are a team inspired to nurture our environment through sustainable steps we take to ensure your natural 'home away from home' is preserved for your return tomorrow."
Tamer Azmy, Co-Founder

THANK YOU FOR BEING PART OF OUR SUSTAINABLE JOURNEY

We provide work places, contribute to the economy and gladly provide the opportunity for our guests to enjoy nature, traditional cuisine, and learn more about Egypt while taking pleasure in the comforts of the hotel and its services.

Our business strategy and plans are based on sustainability, quality and safety. Achieving sustainability objectives and reducing environmental impact are among our priorities.

By being our guests, you are making a contribution to sustainability practices, and we are pleased to share some of them with you here.

Key Sustainable Practices

Energy Efficiency:

In addition to infrastructural energy saving measures, we are implementing energy-saving lighting, setting air-conditioning at recommended 25°C. Each guest room is equipped with a power saving device. In summer season, we store blankets in the wardrobes. To your convenience, AC control panel has an option to set a timer.

Water & Chemicals Conservation:

The fresh water is produced by our own Desalination Plant allowing us monitor water quality 4 times a day at any time. The grey water is recycled by our own Water Treatment Plant where water is prepared within sufficient standards for irrigation of our extensive gardens. Shower heads and taps with low-flow fixtures and toilet flushes are complying with water conservation parameters.

To prevent unnecessary waste of water we change bed linen every twice a week and replace towels that are left by you on the floor. If you feel the need to change them earlier, please inform your housekeeper who will be glad to provide fresh linen and towels.

All chemicals used for cleaning, washing and disinfection are bio-degradable.

Our lush gardens are grown without use of fertilizers.

Waste Reduction:

We focus on reducing waste through minimizing single-use plastic items, sending plastic bottles to recycling companies, providing food leftovers and tree leaves for animals of locals. We use washable containers in public waste bins. Rooms and public restrooms are equipped with refillable soap dispensers. We re-use curtains and other fabrics to make large bags for storing or transporting items.

Together we can make a difference!

Sourcing Ethically:

We are mainly purchasing food and products from local and sustainable suppliers and hand-made decorative features from locals. We are buying in bulks to reduce transportation emissions and grow our own flowers, herbs and mango trees.

Eco-Conscious Design:

With new renovations and constructions, we are focusing on eco-friendly materials and designs that minimize environmental impact, reuse wood and metal, etc. Our garden waste bins are made from former cylinders. We re-use old Christmas trees and dry trees to create new decoration pieces. We use reclaimed wood and metal parts for fences and back area constructions.

People:

All these practices could not be possible without creative minds and exemplary efforts of Brayka Resorts Team, without our strong relationship with local communities and our guests. As per our sustainable management policy, we are committed to keep the hotel and its surroundings an appropriate and safe place, in which ethical, economical and quality standards are given for all people involved.

Coral Reef Protection:

We fully comply with all Egyptian environmental laws and regulations and we support the protection of the coral reef and other animals. Please familiarize yourself with rules and snorkeling area map located on the beach.

- ◆ **Don't stand on corals! They are living creatures!**
- ◆ **Don't touch corals, fish, turtles, dolphins, shells!**
- ◆ **Don't feed wild animals! They are not pets, therefore, feeding them is harmful!**
- ◆ We serve drinks with **straws on request only**. Especially on the beach.
- ◆ The beach bag in your room is our gift to you. Please **don't bring plastic bags to the beach**, they may be blown by the wind into the sea, and turtles may mistake a straw or a plastic bag for food.

Learn more about turtles by joining Turtle Watch events www.turtlewatchegypt.net

- ◆ Please use **reef-safe sunscreens** that contain **none** of coral-bleaching chemicals like:

✗ Oxybenzone (Benzophenone-3) ✗ Octinoxate ✗ Octocrylene ✗ Avobenzone

✗ Homosalate ✗ Octisalate (Ethylhexyl Salicylate) ✗ Parabens

Safe for corals: ✓ **Non-Nano** Zinc Oxide or ✓ **Non-Nano** Titanium Dioxide
